NEWS RELEASE

FY2026 NDSEG Awardees Selected

ARLINGTON, Virginia – The Department of War (DoW) has selected 102 outstanding individuals from 61 U.S. universities as the awardees of the 2026 National Defense Science and Engineering Graduate Fellowship (NDSEG). This prestigious fellowship provides full tuition, a monthly stipend, travel and professional development funding, as well as health insurance coverage. The award is granted for three years, aiming to **propel** these talented individuals toward groundbreaking **discoveries and innovations** relevant to Department of War interests.

Established in 1989, the NDSEG Fellowship Program aims to increase the number of U.S. citizens trained in science and engineering disciplines crucial to national security. Through the NDSEG Fellowship and its mentorship initiatives, the program seeks to propel these talented individuals to the forefront of discoveries and innovations relevant to the DoD, promote the growth of scientists and engineers in key research areas, and support advancements in DoD science, engineering, and technology both now and in the future. With over 5,000 fellowships awarded since its inception, this program continues to support the development of scientists and engineers in relevant research disciplines. For more details and to view the full list of awardees, visit:
<https://ndseg.sysplus.com/NDSEG/awardees/FY2026.aspx>.

The NDSEG awards will be administered by PAL Technologies, Inc. in partnership with Systems Plus, Inc.

The application period for the NDSEG Fellowship for the 2027 class is open through October 30, 2026. To learn more about this opportunity, please visit the NDSEG Fellowship program website at <https://ndseg.sysplus.com>.
